

IRIDIUM POWER®

Features

Improves acceleration!
World's smallest 0.4mm-diameter
center electrode (as of May 2004)

Iridium Power is recommended for:

Drivers that care about performance

Drivers that care about lower fuel consumption

- **Improved output**

Iridium Power has a low required voltage and a high ignitability, resulting in less misfiring and no spark, the outcome being a dramatic improvement in combustion. Engine output is thus increased.

- **Improved acceleration**

With steady ignitability, acceleration performance is improved dramatically.

- **Improved Power**

The 0.4mm center electrode increases output under various driving conditions.

- **Lower fuel consumption**

Even during idling ignition more output is assured, with less fuel consumption and less noise.

Fuel Consumption Comparison Test

Fuel Average

Data: In-Company Comparison

Test Vehicle:

Honda DIO (2cycle, Single Cylinder, Air Cooled 50 cc)

Test Conditions:

Speed 30 km/h, F/W 120 kg. Measured Time 10 minutes

Cooling Air Speed 30 km/h
